Introduction

The Kingdom of Saudi Arabia (KSA) is making rapid advancements at a rapid pace in the economic, social, and technological spheres in a planned manner with the purpose of producing knowledge economy. Besides, the development of a wide range of industries, the government of KSA is encouraging IT based industries to play a role in the country's development. To achieve the goals of such an economic transformation, it requires deliberate planning and vigilant execution of MIS based systems. Therefore, the development of MIS professionals is important to bring about this planned economic transformation in the country. With the expansion of industrial development, the demand for MIS professionals is also increasing. Keeping in view the kingdom's present and future demand for MIS professionals, the program of BBA in MIS has been designed to cater to this need. Through this program, effective MIS skills will be inculcated among undergraduate students to deal with the challenges and problems of industries. Under the globalization of world economies and rapidly changing technology, Saudi Arabian industries are facing intense competition. Through imparting effective MIS skills based on the core knowledge areas of MIS, this program will endeavor to produce professionals who will propel the transformation of Saudi Arabia towards the knowledge economy in line with Vision 2030.

Program Vision

“To be one of the most significant departments in the Ha'il region for teaching our students core business education fundamentals in the areas of management, accounting, finance, economics, and management information Systems.”

Program Mission

The mission of the program is threefold: first, to prepare qualified and labor market competitive graduates to work in the field of management information systems. Second, to conduct cutting-edge research responsive to local and national priorities. Third, to engage in community service in response to local needs.

Program Goals

1. Preparing distinguished graduates with high competitiveness in the field of management information systems.
2. Conduct research that is aligned with local and national priorities in the field of management information systems.
3. Engage in community service in responsive to the local needs.

Measurable Objectives
1. Develop the skill sets that focus on IT service delivery as defined in our mission statement.
2. Research that strengthens the MIS curriculum through multiple concept- driven course offerings. Multiple concept-driven courses whose origins arise from extensive correlational research on two or more different subject areas within the MIS.
3. To educate students on managerial concepts and principles in the development and operation of information systems, systems analysis and design and IT project management.
4. Start IT Service training and development programs for the practitioners from public and private sectors to empower manpower to meet the IT challenges of 21st century effectively and efficiently.
5. Ensuring graduate students campus recruitment in reputed private/public organizations.

Program Graduate Attributes

1. Ability to show a comprehensive and integrated understanding of essential business disciplines, and the ability to apply their specialized knowledge in practice including in multi-disciplinary or multi-professional contexts.
2. Ability to communicate proficiently, negotiate persuasively, lead effectively, within teams and work independently.
3. Ability to use critical thinking, problem solving, digital skills, information and communication technologies (ICT), self-learning, entrepreneurship and teamwork skills for managing and leading organizations.
4. Ability to engage in academic research that impacts policies, businesses, and society

and helps to address the challenges of the 21st century.

5. Ability to demonstrate professional ethics, social responsibility, moderate religious values, national identity, and contribute to improving quality of life of the community.

Admission Requirements

MIS PROGRAM

The number of accepted students is determined by the college councils and the deanship of admission and registration. The conditions for accepting students are as follows:

1. An official high school certificate is required from inside or outside the kingdom of Saudi Arabia.
2. The high school certificate is valid for 5 years for acceptance, exceptions in this regard is referred to the university council.
3. Applicants must have a character certificate of good conduct.
4. Applicants must pass all examinations and interviews conducted by the university council.
5. Applicants must be medically fit.
6. If the applicant is working, no objection letter from the employer is required.
7. Applicant must fulfill any other conditions or requirements required by the University Council during the admission process.
8. The competition between applicants depends on high school percentage, interviews and acceptance exam such as (Qudurat and Tahsili).
9. The minimum passing percentage of high school certificate and examinations may vary every year depending on the number of students and the number of available seats in the course. Admission in the college majors depends on preparatory year GPA, applicants' choices, and seats available.
10. Acceptance in the MIS Program depends on preparatory year GPA, and the availability of seats.

Graduation Requirements

Students in MIS program are required to complete 142 semester-credit-hours covering general educational requirements, core requirements and some elective courses.

A student graduates after successfully completing the graduation requirements according to the degree plan, provided his cumulative GPA not less than “PASS”.

Article 28 (Academic Regulation & Implementation Rules, UOH)

GPA (Out of 4.00)	GPA (Out of 5.00)	Grade Code	Grade	Percentage
4.00	5.00	A+	Exceptional	95 – 100
3.75	4.75	A	Excellent	90 – less than 95
3.50	4.50	B+	Superior	85 – less than 90
3.00	4.00	B	Very Good	80 – less than 85
2.50	3.50	C+	Average	75 – less than 80
2.00	3.00	C	Good	70 – less than 75

0.00	1.00	F	Fail	Less than 60

Academic standards for MIS program

The Bachelor of Science in MIS Program, College of Business Administration in the University of Hail (UOH) is committed to excellence in MIS education and is responsive to accreditation requirements by the NCAAA. The Program intended learning outcomes are set according to the standards and meant to be consistent with the National Qualifications Framework for Higher Education in the Kingdom of Saudi Arabia and under the broad categorization of:

1. Knowledge
2. Skills
3. Values

1. Knowledge

MIS program graduates should have a sound knowledge of a broadrange of concepts and principles:

K1	Discuss Information Systems (IS) principles, architecture, models, theories, emerging technologies, and their business implications.
K2	Describe theories and concepts of system analysis and design, decision making, project management, networking, technology management and e-commerce.
K3	Recognize importance of data security, modeling, analytics, and mining, mathematical and statistical concepts, methods, and techniques to analyze computing-based problems in a business context.
K4	Recognize business administration principles, legal issues, Islamic and Saudi culture and their influence on business models and digital transformation.

2. Skills:

MIS graduates should be able to demonstrate a range of skills to carry out and evaluate information together with thinking and problem-solving techniques specific to MIS as follows:

S1	Apply concepts of Information Systems (IS) and security, project management, technology management, e-commerce, digital transformation initiatives that add social and/or economic value.
S2	Utilize enterprise resource planning and integrated systems and manage data management systems effectively to streamline business processes and ensure organizational effectiveness and efficiency.
S3	Apply business intelligence and analytics applications to develop business strategy, enhance business performance and support decision making including mathematical and statistical techniques.
S4	Discover the relationship between organizations, society, technology, and ethical decision making.
S5	Demonstrate effective communication and problem-solving skills in business, Islamic, and Saudi culture.

3. Values:

MIS program graduates should be able to exhibit a set of values in their functioning as managers as follows:

V1	Demonstrate effective teamwork values and collegiate support while working in teams.
V2	Commit to the ethical and legal uses of digital technologies, professional codes of conduct and the values of the Saudi legal system and culture to ensure social and economic good.

Matrix between Academic Reference Standard and Graduate Attributes

Academic Reference Standard	Graduate attributes
➤ Understand the MIS competencies communications, planning and administration, teamwork, strategic actions, multicultural diversity, and self-management. ➤ Proficient in professional knowledge and skills in design thinking and lean start up practices in preparation for their own enterprises ➤ Develop decision-making and problem-solving skills through the formulation, implementation, and evaluation of alternative solutions to the business and real-world problems and issues in an ethical manner.	➤ Ability to show a comprehensive and integrated understanding of essential business disciplines, and the ability to apply their specialized knowledge in practice including in multi-disciplinary or multi-professional contexts. ➤ Ability to communicate proficiently, negotiate persuasively, lead effectively, within teams and work independently. ➤ Ability to use critical thinking, problem solving, digital skills, information and communication technologies (ICT), self-learning, entrepreneurship and teamwork skills for managing and leading organizations. ➤ Ability to engage in academic research that impacts policies, businesses, and society and helps to address the challenges of the 21st century. ➤ Ability to demonstrate professional ethics, social responsibility, moderate religious values, national identity, and contribute to improving quality of life of the community.

PROGRAM LEARNING OUTCOMES (PLOs)	
Knowledge and Understanding	
K1	Discuss Information Systems (IS) principles, architecture, models, theories, emerging technologies, and their business implications.
K2	Describe theories and concepts of system analysis and design, decision making, project management, networking, technology management and e-commerce.
K3	Recognize importance of data security, modeling, analytics, and mining, mathematical and statistical concepts, methods, and techniques to analyze computing-based problems in a business context.
K4	Recognize business administration principles, legal issues, Islamic and Saudi culture and their influence on business models and digital transformation.
Skills	
S1	Apply concepts of Information Systems (IS) and security, project management, technology management, e-commerce, digital transformation initiatives that add social and/or economic value.
S2	Utilize enterprise resource planning and integrated systems and manage data management systems effectively to streamline business processes and ensure organizational effectiveness and efficiency.
S3	Apply business intelligence and analytics applications to develop business strategy, enhance business performance and support decision making including mathematical and statistical techniques.
S4	Discover the relationship between organizations, society, technology, and ethical decision making.
S5	Demonstrate effective communication and problem-solving skills in business, Islamic, and Saudi culture.
Values	
V1	Demonstrate effective teamwork values and collegiate support while working in teams.
V2	Commit to the ethical and legal uses of digital technologies, professional codes of conduct and the values of the Saudi legal system and culture to ensure social and economic good.

THE DUTIES AND RESPONSIBILITIES OF FACULTY MEMBERS

The faculty members are expected to play a significant part in the growth of the University by assuming different roles and responsibilities as mentioned below. Different Roles & Responsibilities will be applicable to each faculty position to the extent required.

I. GENERAL RULES:

1. All the Faculty shall be punctual to their duties and shall adhere to the college timings, 8:00 AM to 4:00 PM.
2. All the academic faculty are expected to follow the rules and regulations of the university as prevalent from time to time.
3. The workload of all the staff shall be fixed by the management. The work plan of teachers shall ensure, in the most productive manner, the utilization of stipulated 40 working hours per week, with regard to the roles, jobs and targets assigned to them by the Department / College.
4. The faculty should prepare and mention the complete lesson plan for all units in the syllabus and cover the syllabus as per the lesson plan. The syllabus and course specification should be shared with the students at the beginning of every semester.
5. The faculty are expected to update their knowledge by attending seminars / workshops / conference, after obtaining necessary permission from the Chairman / Dean.
6. Do not apply any type of leave frequently unless it is essential. Alternate arrangements with the faculty of the same class is mandatory for all types of leave. Engage the class work of the colleague who have assigned his/her class in the leave letter.
7. Every Faculty Member should maintain student's attendance records and the absentees roll number should be noted everyday in the online attendance system as soon as the class hours are over.
8. Involve in the examination work of the College as examinations are part and parcel of legitimate duty of the faculty member. Alternative arrangements are to be made for exam duty in case of emergency only. Faculty are advised to refrain from making alternative arrangements regularly.
9. The exam papers must be evaluated immediately after the exams and marks submitted to the Chairman for approval, and grades subsequently entered in the online banner system within 72 hours of the exam.
10. Route all the Correspondence through the office of the Chairman of the Department.
11. Assist the Chairman in exigencies and in developmental works.
12. Be available in the Department during the working hours for consultation by the students.

13. All the faculty members should come to the college presenting a smart and decent appearance to project professionalism. Observe the dress code within the campus and on all working days.
14. All academic members of staff will be involved in University statutory bodies and in relevant committees of their College, as assigned by the Dean and Chairman. In addition, academic members of staff will be assigned to other administrative duties according to the needs of the University.
15. The University and the college engages with and contributes to the communities of Saudi Arabia, to enhance its sustainability in a number of meaningful ways. Academic members of staff are expected to contribute to the University's practice of sustainable development and community engagement through the application of their scholarly expertise in a variety of ways, including but not limited to consulting, training, public speaking, service to government bodies and voluntary organisations, conferences, participation in councils and boards, and serving in public fora.
16. Should perform any additional duties assigned from time to time.

II. CLASS ROOM TEACHING:

1. The Faculty Member must strive to prepare himself/ herself academically to meet all the challenges and requirements in the methodology of teaching so that the input may be useful for the student community at large.
2. Every Faculty Member is expected to extend his/her beneficial influence in building up the personality of students and he/she should associate himself/herself actively with such extra-curricular activities which he / she is interested in or assigned to him/her from time to time.
3. Once the subject is allotted, the Faculty Member should prepare the complete lesson plan for all units in the syllabus, and share it with students.
4. At the end of each semester, the course coordinators should prepare the course file. The course file consists of course report; sample of students assignments / test/ quiz; PPT handouts; test/exam question papers; CLO assessment; etc.
5. The Faculty Member should refer to more textbooks in addition to PowerPoint sides and prepare his/her detailed lecture notes. These lecture notes are his/her aids.
6. The Faculty Member should go to the class at least 5 minutes before and enter the class without delay when the class starts. The Faculty Member should engage the full class time and should not leave the class early.
7. In addition to the teaching, the Faculty Member should take additional responsibilities as assigned by Chairman / Dean in academic, co-curricular or extra-curricular activities.
8. The Faculty member should regularly read the latest journals / magazines in his / her specialty and keep himself abreast of latest advancements.

9. The Faculty Members should attempt to publish research papers in reputed International Journals.
10. Participate in subject workshops, teaching workshops and short-term programmes wherever appropriate.
11. Whenever a Faculty Member intends to take leave, the Faculty Member should get the leave sanctioned in advance and with proper alternate arrangements made for class / invigilation. In case of emergency, the Chairman must be informed with appropriate alternate arrangements suggested.

III. ACADEMIC ADVISING :

1. Act as “Mentor” for the group of students who are allotted to him/her by the Department and be responsible for the proper conduct of the Students.
2. Academic Guidance/Counseling/ Monitoring services to be provided to students
3. Encourage the students to participate in curricular and Co- curricular activities.
4. Motivate the students to improve their communication skills and guide them to participate at National/International Conferences organized by the institution and other institutions.
5. Assist the students to finalize their goal and motivate them to reach the goal. Also suggest the various ways and means to strike their targeted goal.
6. Instruct the students to attend the internal / external exams without fail.

Course Description of MIS Program (B.S. in MIS)

CRCL 115 - University Life Skills

Course Code: CRCL 115	Course Name: University Life Skills	
Credits: 3 (3+0+0)	Pre-requisite:	Language: English
This foundational course is designed to equip students with essential academic, personal, and social skills to thrive in a university environment. Students will explore topics such as time management, effective study and note-taking strategies, critical thinking, academic integrity, interpersonal communication, stress and wellness, and career planning. Through interactive lectures, group activities, and reflective assignments, students will develop self-awareness, resilience, and strategies for success in college and beyond.		

ENGL100 – English Language

Course Code: ENGL100	Course Name: English Language	
Credits: 3 (3+0+0)	Pre-requisite:	Language: English
This foundational course is designed to strengthen students' proficiency in key academic English skills. Through focused instruction and practice, students will: - Master fundamental aspects of English grammar and vocabulary essential for effective written and oral communication. - Develop basic strategies in reading comprehension, writing well-structured sentences and paragraphs, and organizing ideas clearly in short essays. - Enhance critical thinking skills through response-based reading and writing tasks. - Build confidence in drafting, revising, and editing written work. The course structure blends engaging lectures with interactive activities—including peer reviews and writing assignments—to promote continuous language development and		

readiness for subsequent university-level communication courses.

MATH 127 – Algebra

Course Code: MATH 127 –		Course Name: Algebra	
Credits: 3 (3+0+0)		Pre-requisite:	Language: English
This course provides students with a solid foundation in the principles and techniques of algebra, emphasizing problem-solving and logical reasoning skills. Topics include: Linear equations and inequalities in one and two variables. Systems of linear equations and methods of solution. Polynomials, factoring techniques, and algebraic fractions. Exponents, radicals, and rational exponents. Quadratic equations, functions, and their graphs. By the end of the course, students will be able to model and solve real-life problems using algebraic methods, interpret mathematical relationships graphically, and apply algebraic reasoning to further studies in mathematics, business, and the sciences.			

MGT103 - Principles of Management

Course Code: MGT103		Course Name: Principles of Management	
Credits: 3 (3+0+0)		Pre-requisite: ENGL100 ENGL1004	Language: English

To provide students with understanding of basic principles, concepts, terminology and practices of management in all types of enterprises. Students will be introduced to management theory, research and practice. Particular attention will be given to the basic managerial functions such as planning, organizing, directing and controlling. Whenever possible, efforts will be made to relate these materials to management in Saudi Arabia. The objective of principles of Management is to guide the professional development of the students by focusing on the core competencies of effective managers.

FIN103 – Principles of Finance

Course FIN103	Code:	Course Name: Principles of Finance	
Credits: 3 (3+0+0)		Pre-requisite: ACC106	Language: English
This course covers theories, concepts, and analytical techniques in financial management, evaluation of financial goals and objectives, overview of financial markets and institutions, financial statements and cash flows, time value of money, ratio analysis, working capital management, short-term financing operating and financial leverages, financial forecasting and planning, capital budgeting techniques. This course is designed to provide a comprehensive initialization and introduction to the field of financial management. The core emphasis is laid on the processes and methodology of financial statement analysis, which can be applied in corporate sector and used as guidelines in assessing, interpreting and planning financial data to meet the objectives of managing a business entity effectively.			

ECN103 - Principles of Microeconomics

Course Code: ECN103	Course Name: Principles of Microeconomics	
Credits: 3 (3+0+0)	Pre-requisite: ENG100 ENGL1004	Language: English

This course is an introductory course and deals with the principles of microeconomics. The course is intended to provide the student with the basic issues concerning microeconomics covering economic concepts, economic approach, demand, supply, and price, along with the analyses of consumer and producer behavior both in the short and long runs. It also covers market structure with explanation of characteristics of different market forms for goods and services as well as factors of production. Some highlights are reviewed about market failure, role of government, taxation and public expenditure, and environmental protection.

ECN105 – Principles of Macroeconomics

Course Code: ECN105	Course Name: Principles of Macroeconomics	
Credits: 3 (3+0+0)	Pre-requisite: ECN103	Language: English
This course is an introductory course and deals with the principles of macroeconomics. The course is intended to provide the student with the basic issues concerning macroeconomics covering economic concepts, economic approach, measurement of national income, models of macroeconomics, aggregate demand and aggregate supply in both short and long runs. The course also covers economic growth, money, and banking, economic fluctuations and international trade economics.		

MKTB103 - Principles of Marketing

Course Code: MKTB103	Course Name: Principles of Marketing	
Credits: 3 (3+0+0)	Pre-requisite: ENGL100 ENGL1004	Language: English

جامعة حائل
University of Hail

The objective of this course is to develop an understanding of the basic elements in marketing strategy such as product planning, market selection, distribution and pricing. In addition it also focuses on the process of integrating all these elements in a coherent marketing mix. The course starts with definitions and discussions on basic concepts of Marketing, the evolution of Marketing and its role in business and economy. This is followed by an analysis of the environments in which Marketing operates, Market Types and analysis (of Consumer markets and Industrial markets), Measuring and Forecasting Market Demand, Marketing Information System, Segmentation, Targeting and Positioning. The course then ends by discussing the Marketing mix elements by emphasizing on the important decisions related to product, price, promotion, distribution and logistics and processes. Other special topics include International marketing, service marketing, and social marketing with some aspects of roles of IT in marketing.

MIS103 - Principles of MIS

Course Code: MIS103	Course Name: Principles of MIS	
Credits: 3 (3+0+0)	Pre-requisite: ENGL100 ENGL1004	Language: English
This course aims to introduce students with the survey of MIS concepts, Information systems for operational, tactical and strategic management in the various functions of an organization. It will also include an overview of end-user computing.		

Course Code: ACC104	Course Name: Principles of Accounting-I	
Credits: 3 (3+0+0)	Pre-requisite: ENGL100 ENGL1004	Language: English
This course aims to impart knowledge of accounting as an important information system in economic entities, with special emphasis on accounting cycle in both service and merchandising companies, recording entries, posting, preparing, and preparing trial balance, income statement, change in equity statement, and balance sheet. It also covers		

STAT102 – Quantitative Methods for Business I

Course Code: STAT102	Course Name: Quantitative Methods for Business I	
Credits: 3 (3+0+0)	Pre-requisite: MATH128	Language: English
This course is intended to provide the students with an introduction to statistics methods for management covering basic functions of arranging data to convey meaning, frequency, distribution tables, measures of central tendency and dispersion in frequency distribution, probability and probability distribution.		

MATH128 – Finite Mathematics

Course Code: MATH128	Course Name: Finite Mathematics	
Credits: 3 (3+0+0)	Pre-requisite: MATH127	Language: English
Linear equations and inequalities, systems of linear equations, basic material on matrices, elementary introduction to linear programming. Counting techniques, permutations and combinations. Probability for finite sample space, basic concepts in statistics. Topics in the mathematics of finance. The main learning outcomes of the course will be the development of analytical skills.		

MATH129 – Business Calculus

Course Code: MATH129	Course Name: Applied Calculus	
Credits: 3 (3+0+0)	Pre-requisite: MATH128	Language: English
The derivative, rules for differentiation, derivative of logarithmic, exponential, and trigonometric functions, differentials, growth and decay models. Definite and indefinite integrals, techniques of integration, integrals involving logarithmic, exponential and trigonometric functions, integration by tables, area under a curve and between curves. Functions of several variables, partial derivatives and their applications to optimization. The main learning outcomes of the course will be the development of analytical skills.		

MGT215 – Business Communication

Course Code: MGT215	Course Name: Business Communication	
Credits: 3 (3+0+0)	Pre-requisite: ENGL 106, MGT103	Language: English
The course focuses on the knowledge and skills associated with clearly receiving, transmitting and communicating information within the business environment. Using communication theory and practical application, students will develop effective writing, speaking, and presentation skills required conveying a business' communication strategy. Besides, covering the broad scope of topics in all forms of business communication, this course introduces a student-friendly writing style and strong design elements to hold students' attention. Real-world examples and real business applications underscore the relevance and importance of the material to the business communication students' academic and career work. Independent and group work activities will be incorporated to the learning environment in order to apply the students' communication skills and knowledge to topics of teamwork, customer relations and leadership.		

MGT317 – Organizational Behavior

Course Code: MGT317	Course Name: Organizational Behavior	
Credits: 3 (3+0+0)	Pre-requisite: MGT 103	Language: English
This course is based on a proposition that managing people, structure, and processes in organizations is a challenging, compelling, and crucial set of tasks. This course will provide an opportunity to students to look inside organizations and to develop their own perspective and skills for managing organizational behavior. It will introduce students to theories, research results, and applications that focus on managing organizational behavior in small, large, and multinational organizations. Since effective management of organizational behavior requires an understanding of theory, research, and practice, through this course students will comprehend the three generic characteristics of organizations namely behavior, structure, and processes that are affected by actions of managers.		

MGT421 – Strategic Management

Course Code: MGT421	Course Name: Strategic Management	
Credits: 3 (3+0+0)	Pre-requisite: FIN103, MGT215	Language: English

This course focuses on teaching the basics and general principles of strategic management. It also aims to provide understanding of the processes of planning and strategic analysis of the firm, applying strategic decisions, and control, using the techniques of case studies analysis to the students. This course also explains strategies formulation and their implementation by the business firms at all the level of functioning viz., Corporate, Business, and Functional. In this course the focus will be given to case studies-based learning, presentations of industry specific organizations strategies, group discussions on the practical application of theories of strategic management, playing management games, and short term projects assignments etc.

MGT313 – Operations Management

Course Code: MGT313	Course Name: Operations Management	
Credits: 3 (3+0+0)	Pre-requisite: MGT 103, STAT 102	Language: English

The students are introduced to the frameworks, key concepts and tools needed to design, implement, control and improve the value chain of operating systems. The course covers management of production and service operations, including capacity planning, process and layout design, and TQM; applications of quantitative techniques like linear programming, forecasting, inventory models, waiting line models, CPM/PERT, simulations and decision theory are discussed within the operations environment.

MIS352 – Integrated Systems & Managing ERP

Course Code: MIS352	Course Name: Integrated Systems & Managing ERP	
Credits: 3 (3+0+0)	Pre-requisite: MIS 322	Language: English

The primary purpose of this course is to lay out the scope of ERP Systems implementation, explain the competitive advantages of using ERP Systems, and support general concepts with short case studies. This course covers the fundamental issues important in ERP implementation and management, starting from information systems, information technology project management perspective. The course includes a review of real cases of ERP implementations related to that particular chapter content.

MIS323 – Data Management Systems

Course MIS323	Code:	Course Name: Data Management Systems	
Credits: 3 (3+0+0)		Pre-requisite: MIS213 MIS328	Language: English
Data Management Systems introduces students to the principles, concepts, and practices of designing, implementing, and managing modern database systems to support organizational decision-making and operations. The course covers topics such as data modeling, relational database design, Structured Query Language (SQL), normalization, data integrity, and database administration, along with emerging trends like NoSQL databases and cloud-based data storage. Students will gain hands-on experience in creating and managing databases, developing queries, and optimizing data retrieval, with a focus on ensuring data quality, security, and scalability to meet business needs.			

MIS339 – IT Service Management

Course MIS339	Code:	Course IT Service Management	
Credits:3 (2+2+3)		Pre-requisite: MIS352	Language: English
IT Service Management focuses on the frameworks, processes, and best practices for delivering, managing, and improving IT services to meet organizational goals and customer expectations. The course emphasizes the ITIL (Information Technology Infrastructure Library) framework, service strategy, design, transition, operation, and continual service improvement. Students will learn how to align IT services with business needs, manage service-level agreements (SLAs), handle incident and problem management, and ensure quality, reliability, and efficiency in IT service delivery. Practical case studies and tools are incorporated to develop skills in planning, implementing, and evaluating IT service management practices in real-world scenarios.			

MIS321 – Introduction to Artificial Intelligence

Course Code: MIS321	Course Name: Introduction to Artificial Intelligence	
Credits: 3 (3+0+0)	Pre-requisite: MIS213	Language: English
Introduction to Artificial Intelligence provides students with a foundational understanding of AI concepts, techniques, and applications in business and technology. The course covers key topics such as problem-solving, knowledge representation, search algorithms, machine learning, natural language processing, expert systems, and intelligent agents. Students will explore how AI technologies are applied in areas like decision support, automation, data analytics, and customer interaction. Through hands-on exercises and case studies, the course develops skills in applying AI tools and frameworks while addressing ethical, social, and managerial implications of AI adoption in modern organizations.		

MGT314 – Human Resource Management

Course Code: MGT314	Course Name: Human Resource Management	
Credits: 3 (3+0+0)	Pre-requisite: MGT103	Language: English
The course provides an introduction to the field of human resource management. The objective is to increase the understanding of how human resource functions as a system contributes to achievement of organization's strategic objectives and how human resource management operates in a larger organizational, social, and legal context through the study of topics such as personnel administration like human resource planning, recruitment, training and development, performance appraisal, legal issues, compensation, and labor relations.		

MGT305 – Project Management

Course Code: MGT305	Course Name: Project Management	
Credits: 3 (3+0+0)	Pre-requisite: MGT103, STAT103,	Language: English

FIN103

The course provides the student with a core project management body of knowledge needed to manage various projects. The course covers the basic fundamentals of project management that are established by the Project Management Institute. This course fulfills one of the requisites needed for successfully completing the PMP certification examination. The following areas of knowledge are covered in the course:

1. Develop a mission statement, vision, goals, and objectives
2. Plan the project
3. Create the work breakdown structure
4. Produce a workable schedule
5. Understand earned value analysis
6. Manage a project team
7. Control and evaluate progress at every stage.

Fully updated based on the latest version of the Project Management Body of Knowledge (PMBOK®), the fourth edition contains new information and expanded coverage on the project risk plan; the change control process; the concept of the project manager as leader; and more. Students will be taught tips and techniques for planning and executing projects on time, on budget, and with maximum efficiency.

MIS444 – Leading Digital Transformations

Course MIS444	Code:	Course Name: Leading Digital Transformations
Credits:3 (3+0+0)	Pre-requisite: IS 217	Language: English

MIS444 – Leading Digital Transformations equips students with the knowledge and skills to drive and manage organizational change in the digital era. The course explores strategies for leveraging emerging technologies, data-driven decision-making, and innovative business models to create competitive advantages. Topics include digital strategy formulation, change management, agile methodologies, customer-centric innovation, and the integration of digital tools across business processes. Through real-world case studies and projects, students will learn how to lead cross-functional teams, overcome resistance to change, and ensure successful implementation of digital initiatives that align with organizational goals and industry trends.

MIS427 – Fundamentals of Web Design

Course Code: MIS427	Course Name: Fundamentals of Web Design	
Credits: 3 (3+0+0)	Pre-requisite: MIS-103	Language: English

Fundamentals of Web Design introduces students to the principles, tools, and techniques for creating effective, user-friendly, and visually appealing websites. The course covers topics such as HTML, CSS, and JavaScript fundamentals, responsive design, usability principles, accessibility standards, and web design best practices. Students will learn how to plan, design, and develop functional web pages that meet both aesthetic and performance requirements. Practical projects provide hands-on experience in building and testing websites, with an emphasis on user experience (UX), search engine optimization (SEO), and aligning web solutions with business and organizational objectives.

Course Code: MIS404– Social & Ethical Issues of Internet

Course Code: MIS404	Course Name: Social & Ethical Issues of Internet	
Credits: 3 (3+0+0)	Pre-requisite: MIS103	Language: English

This course aims on the unique characteristics and challenges of marketing intangible services, with a focus on creating value for both customers and service providers. This course provides students with a comprehensive understanding of service marketing concepts, strategies, and techniques applicable across a wide range of service industries including hospitality, healthcare, finance, and telecommunications. Topics covered include service design, customer experience management, service quality, service recovery, and the integration of digital technologies in service delivery. It aims to help students obtain necessary basic knowledge and skills of defining, measuring, managing and delivering quality services in various service industries. Students will also understand and appreciate the coordinated organizational effort through marketing, human resources and operations in delivering a superior service.

**MIS214 – System Analysis and Design I**

Course Code: MIS214	Course Name: Project Management System Applications	
Credits:4 (3+2+4)	Pre-requisite: MIS 103	Language: English

This course provides a comprehensive introduction to the methodologies and tools used in the analysis and design of information systems. Students will learn to identify business requirements, model processes, and develop system specifications through techniques such as data flow diagrams, use case analysis, and entity-relationship modeling. The course emphasizes the systems development life cycle (SDLC), project management fundamentals, and the role of the systems analyst. Practical exercises and real-world case studies will enhance problem-solving skills and the ability to design efficient, user-centered information systems. Ideal for those pursuing careers in IT and business analysis.

MIS328 – Fundamentals of Computer Networks MIS328

Course Code:MIS328	Course Name: Fundamentals of Computer Networks	
Credits: 3 (3+0+0)	Pre-requisite: MIS213	Language: English

This course introduces the essential concepts and technologies underlying modern computer networks. Students will explore network architectures, protocols, and standards, focusing on the OSI and TCP/IP models. Key topics include data transmission, network topologies, switching, routing, and wireless networking. The course also covers network security principles, addressing encryption, firewalls, and intrusion detection. Practical labs and simulations provide hands-on experience in configuring and troubleshooting network devices. This course is crucial for anyone pursuing careers in network administration, cybersecurity, or IT infrastructure management, laying a solid foundation for advanced networking studies.

STAT103: Quantitative Methods for Business II

Course Code:STAT103:	Course Name: Quantitative Methods for Business II (STAT103)	
Credits: 3 (3+0+0)	Pre-requisite: STAT 102	Language: English

This course continues the exploration of statistical techniques and their applications in business decision-making. Building on foundational concepts, this course delves into multiple regression analysis, time series forecasting, hypothesis testing, and non-parametric methods. Students will learn to use statistical software for data analysis, enhancing their ability to interpret complex data sets. Emphasis is placed on practical application through real-world business scenarios and case studies. The course prepares students to make data-driven decisions, providing essential skills for careers in business analytics, finance, and management. Prerequisite: Quantitative Methods for Business I or equivalent.

ch

MIS 434: Business Intelligence Systems

Course Code: MIS 434	Course Name: Business Intelligence Systems	
Credits: 3 (3+0+0)	Pre-requisite: STAT 103. MIS 103	Language: English

This course provides an in-depth exploration of business intelligence (BI) systems and their role in transforming data into actionable insights for strategic decision-making. Students will learn about data warehousing, data mining, and the use of analytical tools and techniques to interpret complex data sets. Key topics include data visualization, performance management, and the application of BI in various business contexts. The course emphasizes practical skills through hands-on projects using leading BI software. This course will help students become adept at designing and implementing BI solutions to enhance organizational performance and support data-driven decision-making.

MIS 342 – Cyber Security Management

Course Code: MIS 342	Course Name: Cyber Security Management
-----------------------------	---

Credits: 3 (3+0+3)	Pre-requisite: MIS 328	Language: English
University of Hail This course delves into the principles and practices of managing cybersecurity in organizations. Students will explore the fundamental concepts of information security, risk management, and the implementation of security policies and procedures. Key topics include threat identification, vulnerability assessment, incident response, and the legal and ethical aspects of cybersecurity. The course also covers best practices for securing networks, systems, and data. Through case studies and practical exercises, students will learn to design and manage effective cybersecurity strategies. This course will equip students with the necessary knowledge and skills to safeguard organizational assets and maintain compliance with security regulations.		

MIS 213 – Introduction to Programming

Course Code: MIS 213	Course Name: Introduction to Programming	
Credits: 3 (3+0+0)	Pre-requisite: MIS 103	Language: English
1. This course offers a comprehensive introduction to programming, tailored for students with little to no prior experience. It covers fundamental programming concepts such as variables, data types, control structures, functions, and arrays. Students will learn to write, test, and debug programs using a high-level programming language such as Python. The emphasis is placed on problem-solving techniques and logical thinking skills essential for software development. Through hands-on projects and exercises, students will gain practical experience in developing simple applications and understanding the software development lifecycle. This course will help students prepare to tackle more advanced programming challenges and apply coding skills to real-world scenarios		

MIS214 – System Analysis & Design I

Course Code: MIS214	Course Name: System Analysis & Design-I	
Credits: 3 (2+1+3)	Pre-requisite: MIS103	Language: English

This course is intended to provide the students an introduction to system analysis, methods, covering the basic functions of system analyst. It describes the work of system analysts and the tasks of, investigating system requirements, modeling system requirements, traditional & object-oriented approach to user requirement, evaluating alternatives for requirements, analyst tasks in the design phase, and the traditional approach to design.

MIS308 – Fundamentals of Electronic Commerce

Course Code: MIS308	Course Name: Fundamentals of Electronic Commerce	
Credits: 3 (3+0+3)	Pre-requisite: MIS103, MKTB103	Language: English
The course is approached from a managerial perspective on applications and implementations of electronic commerce. After the introduction to electronic commerce the course develops the student's knowledge of e-commerce utilization in retailing, supply chains, e-learning to support services and its development. The technical aspects of security and system development are briefly discussed.		

MIS322 – Business Data Management

Course Code: MIS324	Course Name: Business Data Management	
Credits: 3 (3+0+3)	Pre-requisite: MIS213	Language: English
This course provides a managerial understanding and approach to the technical subject of database management. The course will illustrate the important role that database systems play in an organization and provide you with a background to understand the subject, and a foundation upon which to build your management decisions. This course is designed to investigate how database management system techniques are used to design, develop, implement, and maintain modern database applications in organizations.		

Course MKTB393	Code:	Course Name: Digital Marketing	
Credits: 3 (3+0+3)		Pre-requisite: ENGL100, ENGL1004	Language: English

This course provides an in-depth exploration of digital marketing strategies and tools essential for engaging today's online consumers. Students will learn about search engine optimization (SEO), content marketing, social media marketing, email campaigns, and online advertising. The course emphasizes data-driven decision-making, teaching how to analyze digital marketing metrics and optimize campaigns for better ROI. Practical projects and case studies offer hands-on experience with current digital marketing platforms and techniques. This course prepares students for careers in digital marketing, brand management, and e-commerce, equipping them with the skills to thrive in the digital landscape.

Program Key Performance Indicators

Standard	Code	Key Performance Indicators	Description
-1- Mission and Goals	KPI-P-01	Percentage of achieved indicators of the program operational plan objectives (i8)	Percentage of performance indicators of the operational plan objectives of the program that achieved the targeted annual level to the total number of indicators targeted for these objectives in the same year
	KPI-P-02	The awareness and support of the teaching staff and administrators of the mission of the program/institution (i2)	Percentage of faculty and program staff who are aware of the program / institution's mission using a questionnaire / interview to the total number of faculty and staff.
-3- Teaching and Learning	KPI-P-03	Students' Evaluation of quality of learning experience in the program (i10)	Average of overall rating of final year students for the quality of learning experience in the program on a five-point scale in an annual survey
	KPI-P-04	Students' evaluation of the quality of the courses (i6)	Average students overall rating for the quality of courses on a five-point scale in an annual survey
	KPI-P-05	Completion rate (i12)	Proportion of undergraduate students who completed the program in minimum time in each cohort
	KPI-P-06	First-year students retention rate (i1)	Percentage of first-year undergraduate students who continue at the program the next year to the total number of first-year students in the same year
	KPI-P-07	Students' performance in the professional and/or national examinations	Percentage of students or graduates who were successful in the professional and / or national examinations, or their score average and median (if any)
	KPI-P-08	Graduates' employability and enrolment in	Percentage of graduates from the program who within a year of graduation were:

Standard	Code	Key Performance Indicators	Description
		postgraduate programs (i14,19)	a. employed b. enrolled in postgraduate programs during the first year of their graduation to the total number of graduates in the same year
	KPI-P-09	Average number of students in the class	Average number of students per class (in each teaching session/activity: lecture, small group, tutorial, laboratory or clinical session)
	KPI-P-10	Employers' evaluation of the program graduates proficiency (i26)	Average of overall rating of employers for the proficiency of the program graduates on a five-point scale in an annual survey
	KPI-P-11	Percentage of students' satisfaction with the presence and quality of field activities during the semester and the academic year at the program / college / university.	Percentage of students' satisfaction with the presence and quality of field activities during the semester and the academic year at the program / college / university.
-4- Students	KPI-P-12	Students' satisfaction with the offered services (i18,28)	Average of students' satisfaction rate with the various services offered by the program (restaurants, transportation, sports facilities, academic advising, ...) on a five-point scale in an annual survey
-5- Teaching Staff	KPI-P-13	Ratio of students to teaching staff (i9)	Ratio of the total number of students to the total number of full-time and full-time equivalent teaching staff in the program
	KPI-P-14	Percentage of teaching staff distribution	Percentage of teaching staff distribution based on: a. Gender b. Branches c. Academic Ranking

جامعة حائل
University of Ha'il

ISO 9001:2015

جامعة حائل
University of Ha'il

	KPI-P-15	Proportion of teaching staff leaving the program (i37)	Proportion of teaching staff leaving the program annually for reasons other than age retirement to the total number of teaching staff.
	KPI-P-16	Percentage of publications of faculty	Percentage of full-time faculty members who published at least one research

Standard	Code	Key Performance Indicators	Description
		members (i36)	during the year to total faculty members in the program
	KPI-P-17	Rate of published research per faculty member (i42)	The average number of refereed and/or published research per each faculty member during the year (total number of refereed and/or published research to the total number of full-time or equivalent faculty members during the year)
	KPI-P-18	Citations rate in refereed journals per faculty member (i44)	The average number of citations in refereed journals from published research per faculty member in the program (total number of citations in refereed journals from published research for full-time or equivalent faculty members to the total research published)
	KPI-P-19	Relevance of the qualifications and experience of faculty members to the courses they teach (i17)	Percentage of faculty members with qualifications and experience of the courses they are studying compared to the total number of courses offered during the academic year.
	KPI-P-20	The percentage of full-time teaching staff members and the others of administrative staff that participate in community services activities (i49)	Number of full-time faculty, other staff and administrators engaged in a community service activity during the academic year compared to the total number of faculty, other staff and administrators

ISO 9001:2015

جامعة حائل
University of Hail

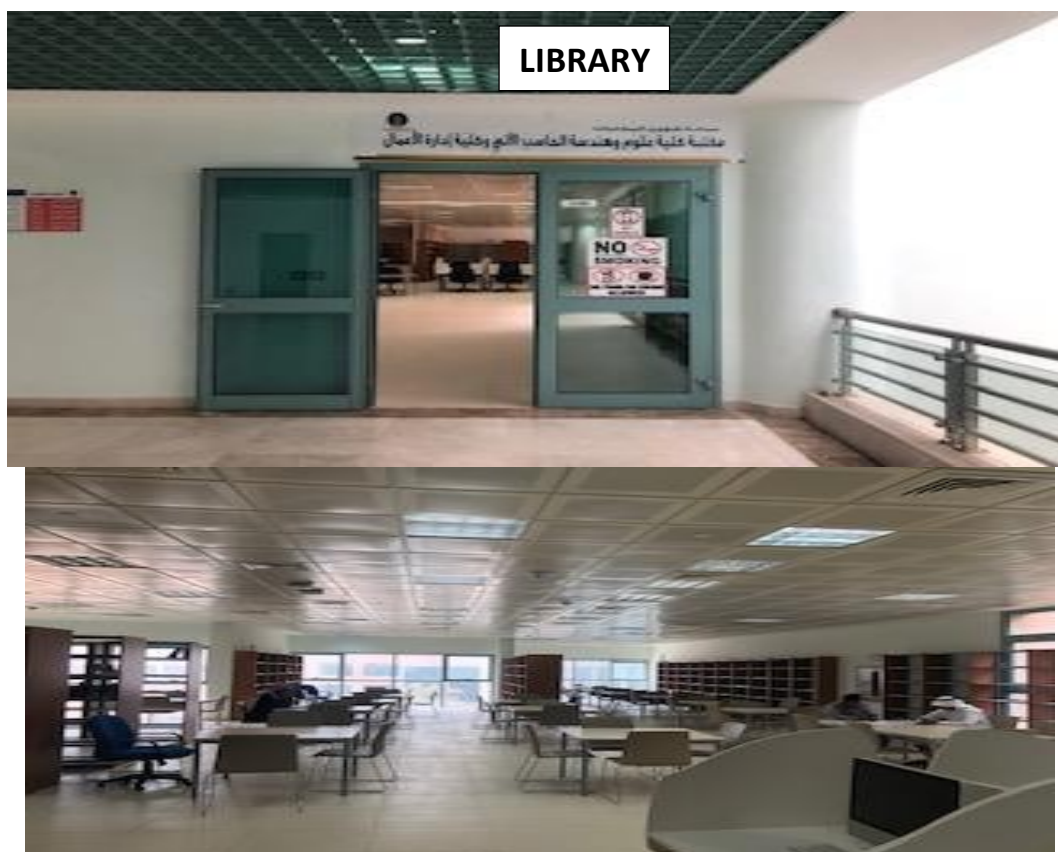

-6- Learning Resources, Facilities, and Equipment	KPI-P-21	Satisfaction of beneficiaries with the learning resources (i13,27,33)	Average of beneficiaries' satisfaction rate with the adequacy and diversity of learning resources (references, journals, databases... etc.) on a five-point scale in an annual survey.
Overall	KPI-P-22	Average percentage of program learning outcome (PLOs) methods	Average percentage of program learning outcome (PLOs) methods

Facilities

Learning Resources:

The present era is characterized by the wide spreading of scientific blocks or groupings of various forms linking between academic and research communities. The university has established the deanship of libraries as a source of knowledge in both hard and digital forms. The library is also connected to the Saudi Digital Library (SDL) which is one of the most prominent forms in supporting the scientific groupings at the national level, where it provides sophisticated information services, as well as providing digital information resources in various forms, and making it accessible to faculty staff, researchers and students in both under-, and postgraduate studies. Besides the main university library, the department has initiated a local library project to facilitate reading and library services offered to students.

جامعة حائل
University of Ha'il

MIS Graduates Skills

After completion of the Degree, the students will be able to:

- a) Provides foundational programming skills essential for software development, web development, and application development roles.
- b) Equips students with knowledge in cybersecurity principles, risk management, and incident response, preparing them for roles in cybersecurity analysis, risk assessment, and security management.
- c) Offers expertise in data analysis, data visualization, and decision support systems, enabling students to pursue careers in business intelligence analysis, data analytics, and strategic decision-making roles.
- d) Provides understanding of emerging technologies such as cloud computing, IoT, and AI, preparing students for roles in digital transformation, technology consulting, and IT innovation.
- e) Focuses on designing and managing computer systems, preparing students for roles in system administration, network architecture, and IT infrastructure management.
- f) Develops skills in visualizing and communicating complex data insights, enabling students to pursue careers in data analysis, dashboard design, and data storytelling roles.
- g) Provides expertise in data mining techniques, predictive modeling, and big data analytics, preparing students for roles in data mining, machine learning, and business analytics.

Graduates Employment Opportunities

This MIS program provides the skill set to enter any of the following general areas within the MIS arena:

- | | |
|-----------------------------------|---------------------------------|
| 1. Analyst/Project Manager | 2. Database Technologies |
| 3. IT Infrastructure | 4. IT Consulting |
| 5. IT Audit and Compliance | |

At the end of the program, students will be prepared for the following professions and occupations:

- | | |
|---|---|
| 1. Systems Analyst | 2. Business Analyst |
| 3. IT Solutions Architect | 4. IT Security Analyst |
| 5. Reporting Analyst | 6. Database Developer and Administrator |
| 7. Network Operations Manager | 8. Business Development Manager |
| 9. Managing Desk and IT Support Manager | 10. IT Account Manager |
| 11. IT Project Manager | 12. IT Consultant |
| 13. Ethical Systems Hacker | 14. Web Developer |
| 15. Research Associate | |
